

A.2

UITLOOPSELS

Teenoorgestelde kant van die knol moet vry van die gebrek wees.

Klas 1: Tot die maksimum mate soos in foto 3 uitgebeeld, is toelaatbaar: Met dien verstande dat die uitloopsels nie 2 mm mag oorskry nie.

Klas 2: Tot die maksimum mate soos in foto 5 uitgebeeld, is toelaatbaar: Met dien verstande dat die uitloopsels nie 4 mm mag oorskry nie.

Klas 3: Tot die maksimum mate soos in foto 10 uitgebeeld, is toelaatbaar: Met dien verstande dat die uitloopsels nie 10 mm mag oorskry nie.

Laagste Klas: Geen spesifikasies.

Redes vir die verskynsel

- Aartappels word te lank na rypwording in grond gelaat.
- Aartappels word te lank na ligting onder droë, warm toestande opgeberg.
- Sommige kultivars loop baie vinniger uit as ander.

Hoe dit vermy kan word

- Moenie aartappels te lank na rypwording (verkieslik nie langer as ses weke) in grond laat nie.
- Erd deeglik op nadat plante afgesterf het.
- Opberging in koel (10-20°C), donker toestande.
- Moenie kultivars wat geneig is om gou uit te loop, lank opberg of in die grond laat nie.

A.2

SPROUTS

Opposite side of the tuber must be free from the defect.

Class 1: To the maximum extent depicted in photo 3 is permissible: Provided that the length of the sprouts are not in excess of 2 mm.

Class 2: To the maximum extent depicted in photo 5 is permissible: Provided that the length of the sprouts are not in excess of 4 mm.

Class 3: To the maximum extent depicted in photo 10 is permissible: Provided that the length of the sprouts are not in excess of 10 mm.

Lowest Class: No specifications.

Reason for the occurrence

- Potatoes are kept too long in the soil after maturity.
- After lifting potatoes are stored too long under dry, hot conditions.
- Some cultivars sprout faster than others.

How it can be avoided

- Do not keep potatoes in the soil too long after maturity (preferably not longer than six weeks).
- Ridge properly after plants have died-off.
- Store in cool (10-20°C), dark conditions.
- Do not keep cultivars that are prone to quick sprouting too long in storage or in the soil.
